1852.

VICTORIA.

BOTANICAL GARDENS.

LAI'D UPON THE COUNCIL TABLE BY THE COLONIAL SECRETARY,

BY COMMAND OF

His Excellency the Lieutenant Governor,

AND

ORDERED BY THE COUNCIL TO BE PRINTED,

28TH JULY, 1852.

Melbourne:

PRINTED BY JOHN FERRES, AT THE GOVERNMENT PRINTING OFFICE.

1852.

REPORT
ON THE
BOTANICAL GARDENS,
Melbourne,

*From the 31st of September, 1851, to the 31st December in the same year, being an addendum to the Report
already sent in.*

Melbourne, 26th July, 1852.

THE date of the last Report submitted, on the state and progress of the Botanical Gardens was the 30th of September last, and the present Report is an addendum thereto for the purpose of completing the Report for the year 1851.

2. No attempt has been made since the date of the last Report, to break up new ground for Plants, as considerable difficulty has been experienced in maintaining the present cultivated portion in order.

3. A second pit of about twenty feet square, has been formed for shading young and tender plants on removal from the hot-house during the winter months, and it has been found of considerable advantage in propagating the plants.

4. A valuable addition of Seeds, consisting of seventy-five packages, has been received from DR. FREDERICK MÜLLER of Adelaide.

5. Accompanying this Report is a Catalogue of the various Plants now in the Gardens, giving their scientific names only; a second Catalogue is being compiled, which will give the botanical and vulgar names of all the plants, &c., which will undoubtedly, be of considerable interest to the public, and on revising this Catalogue triennially, it is expected that in the course of a few years, we shall have a complete Botanical List of all the shrubs and plants in this Colony. 1200

HENRY GINN,
Honorary Secretary and Member of Committee.

LNA
 Pringwood

Catalogue of Plants,

CULTIVATED IN THE BOTANICAL GARDENS, MELBOURNE, IN THE YEAR 1852, TO
 ACCOMPANY THE HONORARY SECRETARY'S REPORT OF 26TH JULY, 1852.
